Contents

NUMBER 1

1 *Joost H. J. Terwindt and Marguerite J. N. Brouwer.* The behaviour of intertidal sandwaves during neap–spring tide cycles and the relevance for palaeoflow reconstructions

33 *Brian Greenwood and Douglas J. Sherman.* Hummocky cross-stratification in the surf zone: flow parameters and bedding genesis

47 *Vernon L. C. McCrory and Roger G. Walker.* A storm and tidally-influenced prograding shoreline—Upper Cretaceous Milk River Formation of Southern Alberta, Canada

61 *Thomas R. Taylor and Duncan F. Sibley.* Petrographic and geochemical characteristics of dolomite types and the origin of ferroan dolomite in the Trenton Formation, Ordovician, Michigan Basin, U.S.A.

87 *Hugh C. Jenkyns and Christopher J. Clayton.* Black shales and carbon isotopes in pelagic sediments from the Tethyan Lower Jurassic

107 *Robert V. Demicco and Elizabeth Gierlowski Kordesch.* Facies sequences of a semi-arid closed basin: the Lower Jurassic East Berlin Formation of the Hartford Basin, New England, U.S.A.

119 *C. R. Fielding.* Fluvial channel and overbank deposits from the Westphalian of the Durham coalfield, NE England

141 *Gregor Borg.* Facetted garnets formed by etching. Examples from sandstones of Late Triassic age, South Germany

147 *Harry M. Edenborn, Alfonso Mucci, Nelson Belzile, Jean Lebel, Norman Silverberg and Bjørn Sundby.* A glove box for the fine-scale subsampling of sediment box cores

DISCUSSION

151 *John Shaw.* Lithofacies types and vertical profile models; an alternative approach to the description and environmental interpretation of glacial diamict and diamictic sequences

152 *Nicholas Eyles, Carolyn H. Eyles and Andrew D. Miall.* Reply

154 *Aleksis Dreimanis.* A correction

157 Forthcoming papers

NUMBER 2

159 *Wolfgang Blendinger.* Isolated stationary carbonate platforms: the Middle Triassic (Ladinian) of the Marmolada area, Dolomites, Italy

185 *Rob L. Gawthorpe.* Sedimentation during carbonate ramp-to-slope evolution in a tectonically active area: Bowland Basin (Dinantian), northern England

207 *Kevin Schofield and Anthony E. Adams.* Burial dolomitization of the Woo Dale Limestones Formation (Lower Carboniferous), Derbyshire, England

221 *V. Paul Wright.* Facies sequences on a carbonate ramp: the Carboniferous Limestone of South Wales

239 *David I. M. Macdonald.* Proximal to distal sedimentological variation in a linear turbidite trough: implications for the fan model

257 *Frank Weirich*. The record of density-induced underflows in a glacial lake

275 *Chris Paola, Giselher Gust and John B. Southard*. Skin friction behind isolated hemispheres and the formation of obstacle marks

291 Book reviews

301 Forthcoming papers

NUMBER 3

303 *Kenneth J. Hsü*. The second fifteen years of the International Association of Sedimentologists, 1967–82—a success story

313 *Brian R. Pratt and Noel P. James*. The St George Group (Lower Ordovician) of western Newfoundland: tidal flat island model for carbonate sedimentation in shallow epeiric seas

345 *R. H. Dott Jr, C. W. Byers, G. W. Fielder, S. R. Stenzel and K. E. Winfree*. Aeolian to marine transition in Cambro–Ordovician cratonic sheet sandstones of the northern Mississippi valley, U.S.A.

369 *R. M. H. Smith*. Sedimentation and palaeoenvironments of Late Cretaceous crater-lake deposits in Bushmanland, South Africa

387 *A. G. Plint*. Slump blocks, intraformational conglomerates and associated erosional structures in Pennsylvanian fluvial strata of eastern Canada

401 *Roger M. Tucker and J. R. Cann*. A model to estimate the depositional brine depths of ancient halite rocks: Implications for ancient subaqueous evaporite depositional environments

413 *Zhenlin Li and Paul D. Komar*. Laboratory measurements of pivoting angles for applications to selective entrainment of gravel in a current

425 *Paul D. Komar and Zhenlin Li*. Pivoting analyses of the selective entrainment of sediments by shape and size with application to gravel threshold

DISCUSSIONS AND REPLIES

437 *Jay van Tassell*. The hydraulic interpretation of turbidites from their grain sizes and sedimentary structures (Discussion)

438 *Paul D. Komar*. 'Breaks' in grain-size distributions and applications of the suspension criterion to turbidites (Reply)

441 *Alan C. Kendall*. Botryoidal aragonite and its diagenesis (Discussion)

443 *Djafar M. Aïssaoui*. (Reply)

445 *J. Wendt*. Progradation geometries of carbonate platforms: examples from the Triassic of the Dolomites, northern Italy (Discussion)

447 *Alfonso Bosellini*. (Reply)

453 Book reviews

463 Forthcoming papers

NUMBER 4

465 *Chang-Shu Yang*. On Bagnold's sediment transport equation in tidal marine environments and the practical definition of bedload

487 *Rudy Slingerland*. Numerical computation of co-oscillating palaeotides in the Catskill epeiric Sea of eastern North America

499 *Julian E. Andrews*. Microfacies and geochemistry of Middle Jurassic algal limestones from Scotland

521 *Jürgen Schieber*. The possible role of benthic microbial mats during the formation of carbonaceous shales in shallow Mid-Proterozoic basins

537 *K. V. Thomas and M. Baba*. Berm development on a monsoon-influenced microtidal beach

547 *Jens Ledet Jensen and Michael Sørensen*. Estimation of some aeolian saltation transport parameters: a re-analysis of Williams' data

559 *S. J. Mathers and J. A. Zalasiewicz*. A sedimentation pattern in Anglian marginal meltwater channels from Suffolk, England

575 *Ian St John Fisher*. Pyrite replacement of mollusc shells from the Lower Oxford Clay (Jurassic) of England

587 *S. D. Burley and J. D. Kantorowicz*. Thin section and S.E.M. textural criteria for the recognition of cement-dissolution porosity in sandstones

DISCUSSIONS AND REPLIES

605 *Andrew Hurst and Per Arne Bjørkum*. Thin section and S.E.M. textural criteria for the recognition of cement-dissolution porosity in sandstones (Discussion)

608 *S. D. Burley and J. D. Kantorowicz*. (Reply)

615 *R. Nicholson*. Fibrous gypsum and fibrous anhydrite in veins (Discussion)

616 *Hans-G. Machel*. (Reply)

619 *James A. Robertson*. Discussion of Miall (1985)

621 Book reviews

625 Forthcoming papers

NUMBER 5

629 *R. M. Carter, L. Carter and D. P. Johnson*. Submergent shorelines in the SW Pacific: evidence for an episodic post-glacial transgression

651 *Yong il Lee and George DeVries Klein*. Diagenesis of sandstones in the back-arc basins of the Western Pacific Ocean

677 *G. S. Boulton*. Push-moraines and glacier-contact fans in marine and terrestrial environments

699 *Julian A. Dowdeswell and Martin Sharp*. Characterization of pebble fabrics in modern terrestrial glacigenic sediments

711 *André Strasser*. Ooids in Purbeck limestones (lowermost Cretaceous) of the Swiss and French Jura

729 *A. Bellanca, S. Calderone and R. Neri*. Isotope geochemistry, petrology and depositional environments of the diatomite-dominated Tripoli Formation (Lower Messinian), Sicily

745 *H. Dill and H. Nielsen*. Carbon-sulphur-iron-variations and sulphur isotope patterns of Silurian Graptolite Shales

757 *C. Tarquin Teale and D. Alan Spears*. The mineralogy and origin of some Silurian bentonites, Welsh Borderland, U.K.

767 *Edward Bryant*. Sample site variation in settling velocity distribution subpopulations using curve dissection analysis

777 *J. Hilton, J. P. Lishman and A. Millington* A comparison of some rapid techniques for the measurement of density in soft sediments

783 Book reviews

793 Forthcoming papers

NUMBER 6

795 *Gary Kocurek and Jamie Nielson*. Conditions favourable for the formation of warm-climate aeolian sand sheets

817 *Jean-Pierre Petit and Jacques Beauchamp*. Synsedimentary faulting and palaeocurrent patterns in the Triassic sandstones of the High Atlas (Morocco)

831 *V. Paul Wright*. The role of fungal biomineralization in the formation of Early Carboniferous soil fabrics

839 *J. M. Hooke*. The significance of mid-channel bars in an active meandering river

851 *J. S. Bridge, N. D. Smith, F. Trent, S. L. Gabel and P. Bernstein*. Sedimentology and morphology of a low-sinuosity river: Calamus River, Nebraska Sand Hills

871 *Michael C. Boulter and Andrew Riddick*. Classification and analysis of palynodebris from the Palaeocene sediments of the Forties Field

887 *R. A. Pickrill*. Sediment pathways and transport rates through a tide-dominated entrance, Rangaunu Harbour, New Zealand

899 Book reviews

905 Forthcoming papers
